# Minutes of the 127th Energy Calibration Meeting held on 25 April 1997

## 1 93-95 Analysis update

Mike Koratzinos showed further cross checks towards the systematic errors, including: the horizontal correctors, the "train" model with offset day of the week and the temperature coefficient. The tide coefficient still needs to be updated. The smoothed database will be used. Further comparisons of the "truely 2d" model with 2D2T, NMR48 and the deterministic train ("Tuesdays") model also have to be made before the model can be frozen and energy files produced.

Tiziano described the paper outline in the revised format. Draft 0 should be available once the error analysis section has been written.

## 2 Paul Bright-Thomas practice talk for Vanderbilt

Paul showed the material he plans to include in his Vanderbilt talk.

## 3 Next Meeting

The next meeting will be on 2 May 1997, to discuss planning for the forthcoming run.

Pippa Wells, 05 May 1997.
