

Groundsman Report: AGM 25th November 2019

- The lawnmower appears to be functioning well overall through the 2019 season
- A new battery for the lawnmower will be purchased prior to the start of the 2020/21 season. The old battery has been removed already.
- Tidying of the hut is required in the spring, including the fridges and freezers to prepare for the start of the season
- The repair to the wooden façade was performed by CERN
- All petrol cans need filling up before the start of next season.
- The wooden decking around the hut is starting to rot, this will all need re-doing as in some areas it is pretty unstable
