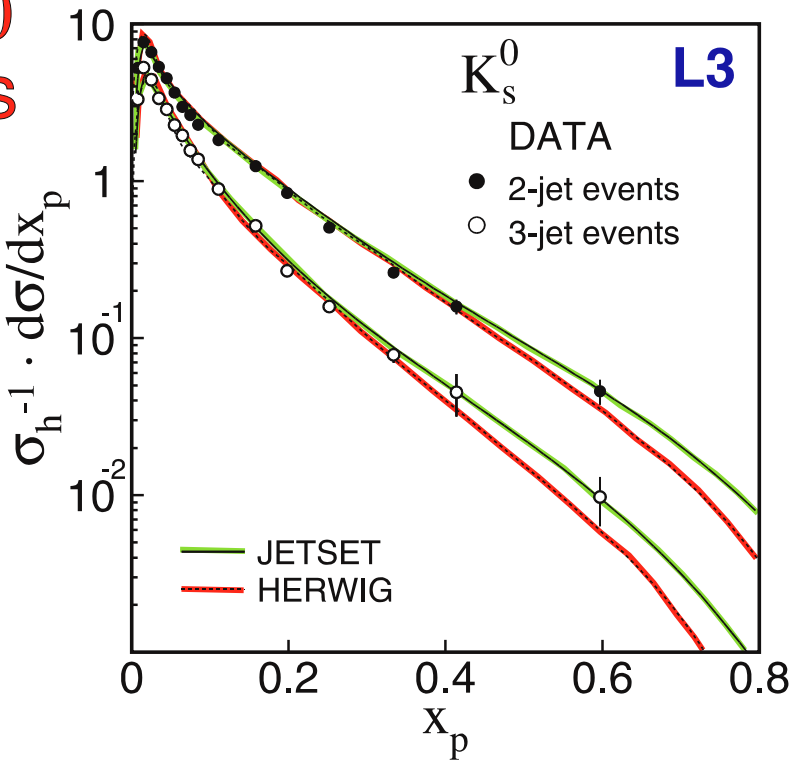
momentum spectra in two- and three-jet events

the same measurements are repeated for 2- and 3-jet event for different x_p bins where $x_p = p/E_{beam}$

K^0_S

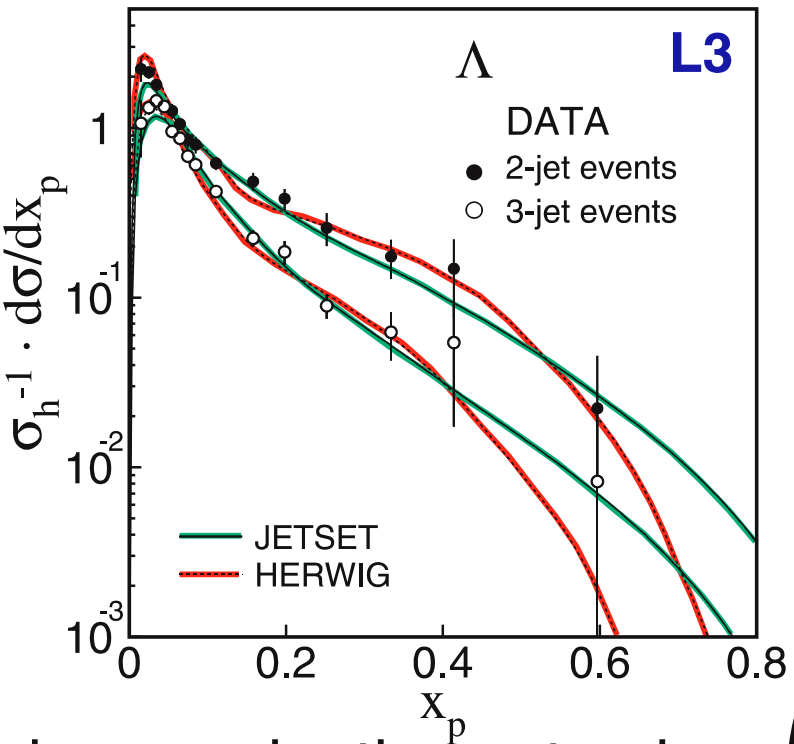


JETSET & HERWIG

- Good agreement with data for both models

	R_{32}
DATA :	1.30±0.02
JETSET :	1.26
HERWIG:	1.12

Λ



JETSET & HERWIG

- Slight disagreements with data at low momentum
- Different expectations at high momentum but both consistent with data

	R_{32}
DATA :	1.40±0.04
JETSET :	1.42
HERWIG:	1.19

- Higher production rates in 3-jet events

for charged particles

	R_{32}
DATA :	1.36±0.02
JETSET :	1.30
HERWIG:	1.30
