

Supplementary material for LHCb-PAPER-2016-025

Normalised moments and covariance matrix

The normalised moments, $\bar{\Gamma}_i$, and corresponding covariance matrix, \bar{C}_{ij} , are included in a supplementary file `LHCb-PAPER-2016-025-supplementary.txt`. The covariance matrix contains contributions from both the statistical and systematic uncertainties. As the statistical errors are dominant, the systematic uncertainties are treated as uncorrelated.
