Chapter 1. Package Lists

The following chapter provides an overview of packages in Red Hat Enterprise Linux 7.

Note

Packages designated as core have higher levels of support than non-core. For details on the distinction in support levels, refer to:

https://access.redhat.com/support/offerings/production/scope_moredetail.html

1.1. Base Channel

1.1.1. Server Variant

The following table lists all the packages in the Server variant. *Core Packages* are explicitly referenced in a comps group and can be selected directly using anaconda or kickstart.
