The EMI Project Technical Board

The EMI Project Technical Board (PTB) is led by the Technical Director (TD) and composed of the Technical Area Leaders (add URL) and a representative and is responsible to assist the TD in defining the technical vision of the project and deciding on specific technical issues. The PTB members are the coordinators of the project Technological Areas (add URL). The PTB can invite experts (e.g. product team leaders, component developers, etc.) or delegate specific tasks to appointed working groups as required.
