

Location in Eq. 7.3

| Parameter       | Value   | (a) | (b) | (c) | Meaning                              |
|-----------------|---------|-----|-----|-----|--------------------------------------|
| $\kappa_\tau$   | 2.0     | ✓   |     |     | $\tau_h$                             |
| $\kappa_e$      | 0.4     | ✓   | ✓   | ✓   | $e$                                  |
| $\kappa_\mu$    | 1.0     | ✓   | ✓   | ✓   | $\mu$                                |
| $\kappa_{jet}$  | 0.6     | ✓   | ✓   | ✓   | jet                                  |
| $\kappa_F$      | 5.0     |     |     | ✓   | Emphasis on high $\tau_h$ efficiency |
| $\gamma_e$      | 2.0     |     |     | ✓   | $e$                                  |
| $\gamma_\mu$    | 2.0     |     |     | ✓   | $\mu$                                |
| $\gamma_{jet}$  | 0.5     |     |     | ✓   | Focus on jet separation              |
| $\gamma_{cmb}$  | 2.0     |     | ✓   |     | $e, \mu, \text{jet}$                 |
| $\omega_\alpha$ | varying | ✓   |     |     | Sample normalization                 |
