

## Question

For the CDS Twiki pages we have setup in the past a simple notification where any update is sent to our developer mailing list.

This is to let you know that since GeorgeTown (18 August) has been put on production we have nomore received any notification, although many pages have been modified in our Web since then.

Best regards, Samuele

## Answer

**⚠ If you answer a question - or have a question you asked answered by someone - please remember to edit the page and set the status to answered. The status is in a drop-down list below the edit box.**

We are investigating this

-- PeterJones - 03 Sep 2009

I though that this had been solved as I was receiving notifications for some webs.

The problem is linked with the timestamps in `wiki/working/work_areas/MailerContrib`

I wil check if I get notification for *this* change and if so reset all timestamps.
