Book View

BookView is an option available from the advanced search topic. It allows you to display the result in "book view", that is, the whole content of topics is shown instead of a topic summary. This allows you to easily see a whole set of pages.

If you want to print a set of pages it is recommended to create a topic that includes a set of topics, which gives more control over formatting and layout for printing.

Related Topics: UserDocumentationCategory, WebSearchAdvanced
